

SEE WEDNESDAY'S REPUBLIC FOR MERCHANTS' MIDWEEK ANNOUNCEMENTS

SOLID FACTS FOR VOTERS.

When the present administration entered upon its work of gathering order out of chaos it was confronted with many difficulties, many financial. The Ziegenhain exponents did not believe in allowing surpluses of revenue to accumulate.

City Comptroller Player, a financier of no mean merit, found that he had the task of his life on his hands. At the beginning of his first fiscal year there was a deficiency in the municipal revenue account amounting to \$121,746.66. The books, when he took charge, showed a nominal balance of \$23,556.66, but the outstanding obligations were far in excess of this amount, sufficiently so to leave the deficit given above.

Now as to the Democratic record. At the close of the first fiscal year, April 7, 1902, there was a balance of \$305,555.93 after the payment of the obligations bequeathed by the Ziegenhain administration. At the close of the fiscal year, April 13, 1903, there was a balance of \$275,739.93, and at the close of the last fiscal year, April 11, 1904, the balance was \$674,174.75, despite the fact that the appropriations for public work and the betterment of the city were made on a generous scale. In view of this showing, is it not proper to ask: "What did they do with the money?"

PORT ARTHUR BATTLE RAGES;
FIGHT AT SHAKHE RESUMED.

Japanese Hurl Enormous Forces Against Ramparts of Besieged City, Capturing New Position.

Mikado's Troops Begin Attack on Kuropatkin's Positions at Lone Tree Hill and Sinchup.

DRAWING THE CORDON CLOSER

OYAMA AGAIN RE-ENFORCED.

Chaofo, Oct. 31.—The assault on Port Arthur, which began October 24, has developed into a raging battle, which the Japanese believe will result in the fall of the fortress.

In a manner almost superhuman, the Japanese are said to have rushed enormous forces against the ramparts, hoping by their very superiority in numbers to scale the walls and overpower the enemy.

The result of yesterday's fighting has not been learned.

The fiercest fighting took place on the shore at Riblung Mountain, which the Japanese captured.

The entire Japanese cordon is drawing closer and a terrific bombardment is taking place.

A shelling, like the previous one, was a characteristic incident of weary weeks of trench fighting, gunnouncing and small engagements. In the opinion of experts, the present will cease when the Japanese have secured each position as will enable them to close steadily closer under the guns of the Russian guns.

On October 31, having made every possible preparation, the Japanese opened fire with their artillery along the whole line, continuing their daily practice of throwing shells into the harbor. The Japanese replied, the sounds of distant guns were heard.

The bombardment continued furiously all the afternoon on October 31, when the Japanese guns on the Etsu Mountain, Riblung Mountain and Sinchup were heard to be firing. At 4 o'clock that afternoon a regiment of Japanese swept over the Russian trenches and captured the Riblung Mountain and advanced to the Russian trenches lying between Riblung Mountain and Sinchup, and the Japanese were heard to be firing.

The Japanese are now using machine guns with great accuracy and are attacking the trenches on the shore at Riblung Mountain.

ENGINEERS STRIKE
AT MIDNIGHT IN
ILLINOIS MINES

Fifty Thousand Coal Miners Will Be Thrown Out of Work in Bituminous District.

PRICE OF COAL MAY RISE.

Strikers Fail to Agree With Operators on Wage Scale.

REFUSE 5.55 PER CENT CUT.

Miners, Who Accepted Similar Cut in April, Said to Be Dissatisfied With Action of Hoisting Engineers.

The strike of hoisting engineers in the Illinois coal mines, which is expected to result in a shut-down, will be peacefully inaugurated on account of a religious holiday.

The results of the strike promise to be as follows:

Eight hundred engineers will quit work at midnight in 240 mines.

Operators will order shut-down of mines to-morrow morning.

Fifty thousand miners will be thrown out of work.

Higher prices in soft coal may prevail.

Cause—Refusal of engineers to accept cut of 5.55 per cent in wages.

REPUBLIC SPECIAL.

Daunville, Ill., Oct. 31.—Mack Taylor, national president of the Coal Mine Hoisting Engineers, ordered a general strike in Illinois at midnight.

In a conversation with T. L. Jenkins, national secretary, he said:

"The main argument of the coal operators in the engineers' controversy is that the engineers should submit to a reduction of wages as all other employees at the mines have done."

"This argument is answered by the engineers with the claim that they have not been advanced with the other employees and that if they should submit to all the reductions they are first entitled to all the advances."

"The miners established their present relation with the operators after the strike of 1897. At its termination a scale of wages was established, since which time they have received three advances in wages, aggregating 14 cents per ton in the Danville district, the basing point, or about 34 per cent."

In April, 1904, they submitted to a reduction of 5.55 per cent. The engineers first established a scale of wages in 1899. Since then it has been revised, first in 1900, by changing from a uniform scale to a graded according to the output of the mines."

In this revision engineers employed at class A mines received 3 per cent of an advance. Engineers at class B mines were
